

ENDORSEMENT HO-2306 — SEWER AND DRAIN BACKUP COVERAGE

Attaches to and forms a part of: Form HO-0304, Edition 01-22 or Edition 02-23

PURPOSE

This endorsement buys back the coverage otherwise excluded under Exclusion E-17 (Water Backup and Sump Overflow) of the attached HO-0304 policy form.

COVERAGE PROVIDED

Subject to the limit shown below, we cover direct physical loss caused by water or waterborne material which backs up through sewers or drains, or which overflows or is discharged from a sump, sump pump, or related equipment, regardless of the cause of the backup or overflow, including heavy rainfall, blocked municipal sewer lines, or mechanical or electrical failure of the sump pump.

LIMIT OF LIABILITY

\$5,000 per occurrence (Basic Limit), or \$10,000 per occurrence if the Enhanced Limit option is selected and the additional premium shown in the Declarations is paid.

EXCLUSIONS THAT STILL APPLY

This endorsement does not cover loss caused by flood, surface water, or overflow of a body of water (Exclusion E-3 continues to apply in full). It does not cover loss caused by the insured's neglect to maintain the sump pump or sewer lateral in working order.

CONDITIONS

This endorsement applies only while attached to Form HO-0304, Edition 01-22 or Edition 02-23. It is not compatible with, and is superseded by, Endorsement HO-2405 on policies written on Edition 03-24, which already includes a built-in sudden-discharge sublimit.
