

ENDORSEMENT HO-2405 — WATER BACKUP AND SUMP DISCHARGE ENHANCED LIMITS

Attaches to and forms a part of: Form HO-0304, Edition 03-24 only

PURPOSE

Form HO-0304, Edition 03-24 already provides, under the revised Exclusion E-17, a built-in sublimit of \$10,000 per occurrence for sudden and accidental discharge or overflow of water from within a plumbing, heating, air conditioning, automatic fire protective sprinkler system, or household appliance. This endorsement increases that built-in sublimit and separately buys back coverage for backup through sewers or drains from outside the plumbing system, which the base E-17 exclusion (as revised in Edition 03-24) does not cover.

COVERAGE PROVIDED

1. Increases the sudden-and-accidental-discharge sublimit already provided by Edition 03-24's E-17 exclusion from \$10,000 to the Enhanced Limit shown in the Declarations (\$25,000 or \$50,000).
2. Adds coverage for loss caused by water that backs up through sewers or drains, or that overflows or is discharged from a sump, sump pump, or related equipment, from a source outside the plumbing system — coverage that base Edition 03-24 E-17 does not provide even with the sudden-discharge carve-back.

EXCLUSIONS THAT STILL APPLY

Loss caused by continuous or repeated seepage over time is not covered under this endorsement or under the base policy. Flood and surface water remain excluded under Exclusion E-3.

CONDITIONS

This endorsement applies only while attached to Form HO-0304, Edition 03-24. It is not the same coverage as, and cannot be attached to, Edition 01-22 or Edition 02-23 policies — those use Endorsement HO-2306 instead, which has no built-in sublimit to enhance.
